

Sage 300 2025 Release Notes

Thank you for choosing a Sage business management solution.

These release notes contain important information about Sage 300, including information about product changes that are not in the documentation.

In this document:

Product updates contain modified versions of one or more Sage 300 program components. A product update is not a full upgrade or a product replacement. Each product update is valid only until we release the next product update or the next version of Sage 300.

Depending on your purchase agreement, some features described here may not be available in your product.

For more information about feature availability, see Sage Knowledgebase article [105946](#).

What's new in Product Update 1

Important! If you are using Sage 300 Web Screens and have installed both Sage 300 Canadian AND US Payroll, it is essential that the same version of the Canadian and US Tax Updates are installed. Failure to do so may prevent successful login to the Web Screens.

This section contains a summary of new features and changes in Product Update 1.

General improvements

This release includes the following new features and improvements in both Sage 300 web screens and Sage 300 classic screens:

Accounts Payable

We have updated the T5018 (CPRS) forms for Tax Year 2024.

Program fixes

This product update also includes program fixes. See the [list of fixed issues](#) in Technical Information for more information.

What's new in Sage 300 2025

This section contains a summary of new features and changes in the 2025 release.

This release includes the following new features and improvements in both Sage 300cloud web screens and Sage 300 classic screens:

Payroll

Sage 300 US and Canadian Payroll web screens are now installed by the Payroll Tax Update installation programs (beginning with Tax Update CT80D_Q32024 - September 19, 2024/UT80D_Q32024 - September 19, 2024) and not by the Sage 300 core installer.

Note: To use Payroll web screens with 2025.0 you must install Canadian and/or US Tax Update: CT80D_Q32024 - September 19, 2024/UT80D_Q32024 - September 19, 2024 or higher.

General Ledger

You can now bring up transaction lists by double-clicking on an account in the General Ledger Chart of Accounts.

In addition to printing General Ledger transactions, you can also export them to programs such as Excel.

These General Ledger features are available on web screen and Desktop.

System Manager

Access to Sage Information Center is now available on web screens.

Click on Information Center to access Sage 300 product resources and new updates.

Sage Intelligence

Sage Intelligence has been updated to a new version. Further information is in the Technical Information section.

eInvoicing

eInvoicing for sending invoices, credit notes and debit notes to the Malaysian Government is now available.

It requires separate installation as well as Sage 300 2024 PU2 or higher.

For more information, please see the User Guide and Online Help.

HR Integration

In addition to installing and activating 2025.0, you will need to install and activate Sage HR Integration v8.0.

In a Workstation Setup environment, you will need to register each workstation by performing wssetup.cmd.

Refer to Sage 300 Online Help for more information.

Tip: To avoid issues before you begin running Sage HR integration on the workstation, ensure Payroll 8.0 has at least tax update "C" installed on the server.

To begin:

1. If applicable, uninstall the existing workstation setup.

2. Install the workstation setup (wssetup.exe) that comes with the product update.

3. Run the wssetup.cmd

Program fixes

This product update also includes program fixes. See the [List of fixed issues](#) in Technical Information for more information.
